

# HELLO

*my lovely residents!*

My name is Anita Chen  
I will be your resident advisor for the 2017-2018 academic year. It will be such an amazing experience to live and work with all of you and I am really excited to meet all of you in the new semester. As your RA, I am very honored to be there and help you with anything you need!

*Something about myself:*

I am a third year undergraduate student with an emphasis in Sculpture and Art and Technology. My work is mainly three to four dimensional and later develops the element of interaction and performance by combining coding and Arduino. I am interested in beauty standards and double standards, and how women use anything from surgery to retail therapy to unnaturally enhance their femininity.

If you have  
any question,  
or just want  
to say hi,  
FEEL FREE  
to send me  
an email at
