Event Information

**Thursday, January 16, 5-10 p.m. at the Sullivan Galleries** located at 33 S. State Street, 7th floor. This event is open to all SAIC students, faculty, and SAIC/AIC staff for participation. The evening will begin with a short lecture by event organizer Will Robertson; Nick Briz, and John Cates. Members of the general public are invited to view the event. There is no cost to participate or to attend.

How to Participate

Participants must be present during the event (or appoint a proxy to represent you), and sign up for a timeslot upon arrival. **Timeslots are available on a first-come, first-served basis.** Participants must sign a SAIC loan form and agree to exhibit original work for which they own the copyright. Participants must secure permission to exhibition the work from all individuals appearing within their work. In the event that SAIC deems a work inappropriate or offensive, we retain the right to cease projection.

Connecting to a Projector

There will be four different types of projector connections available (HDMI, VGA, RCA, and USB). In order to connect to a projector to share your work you will need to bring your own video adapter or device with the appropriate ports to connect to the devices. We will have a limited number of adapters to Mini DisplayPort available for use. Adapters for computers may be available for students, faculty and staff at the Media Center; contact them directly for further information and stipulations.

Connecting to a Media Player

If you decide to show pre-rendered work using one of the media player stations you will need to bring your own USB flash drive with your video files on it. Projectors will be set to display at a resolution of 1920 x 1080p. It is highly recommended that you format your files to conform to this resolution. The media players will support the following file types:

- Video—MKV, OGM, AVI, WMV, QuickTime, Real, MPEG-1, MPEG-2, MPEG-4, DVD (VOB) (Codecs: XviD, MSMPEG4, ASP, H.264, AVC)

- Audio—OGG, MP3, WAV, RA, AAC, M4A, AU, AIFF • Subtitles—SRT, SSA, ASS, and SAMI

**NOTE:** Speakers will not be provided during the event. If you wish to include sound in your video you must bring your own speakers. The media players will support audio output via a 1/8’ stereo jack. Outlets will be available to enable the use of powered speakers.
Power

Power outlets will be supplied at all VGA, HDMI, and RCA stations to enable participants to plug in their devices throughout the evening. For people who wish to bring their own projectors, a limited number of power-only areas will be provided.

Time Limit

Participants are limited to sign up for one half-hour timeslot per person. This half hour includes setup and take-down time. Participants may extend time if no one has signed up for the subsequent timeslot.

Internet

Wireless internet is only available for computers already configured for the SAIC/AIC network, and may be limited. If your piece is web-based, we strongly recommend that you save your content and run it offline.

On-site technical support will be limited. If you have questions or feedback regarding the technical requirements or compatibility for the event please contact William Robertson at wrober1@artic.edu.
