Use these instructions to set your Windows XP operating system to dial-up AIC/SAIC’S modem pool to gain access to the Internet, Intranet, and other online resources. The AIC/SAIC Modem Pool currently works with 56.6k modems or lower only.

DIAL-UP USING WINDOWS XP Using Connection Wizard

1. To launch Connection Wizard, go to: Start Menu>All Programs>Accessories>Communications>New Connection Wizard. CLICK NEXT

2. Select the “Connect to Internet” radio button to select a dial-up setting. Click next.

3. Select the “Set up my connection manually” radio button. Click next.

4. Select the “Connect using a dial-up modem” radio button. Click next.
Name this setting to identify it.

Enter the dial-up phone number. If you are outside the (312) area code, make sure to add a “1” and appropriate dashes. Click next. Please note: telephone charges are applied by telephone service.

Enter your personal AIC/SAIC login and password. Your artic.edu online account must be previously activated. Click next. Logins are usually the first letter of your first name, and the first 5 letters of your last name.

You’re finished! If you prefer a shortcut to this connection setting on your desktop, click the appropriate box.

Click Finish.
