

FULL-TIME TENURE-TRACK FACULTY POSITION IN FILM, VIDEO, NEW MEDIA, AND ANIMATION

The Department of Film, Video, New Media and Animation (FVNMA) at the School of the Art Institute of Chicago (SAIC) invites applications for a full-time, tenure-track assistant professor position from candidates with expertise in experimental 3D animation, to begin in August 2023. Salary is competitive with peer institutions and commensurate with the quality of the practice, extent of teaching experience, and current professional standing.

DEPARTMENT PROFILE

The Department of Film, Video, New Media and Animation began nearly a half-century ago and has moved far beyond traditional approaches to the media arts. Our commitment to interdisciplinarity crosses a broad spectrum of disciplines and genres, including non-fiction, narrative and experimental film and video, animation, time-based installation, and new media. Today FVNMA is home to an award-winning faculty of artists, thinkers, curators, historians, and media activists, as well as a gifted group of undergraduate and graduate students from around the world. One of the largest studio programs at SAIC, the Department of FVNMA has ten tenured faculty members and more than twenty-five part-time faculty members with a very broad range of expertise.

Closely associated with FVNMA are several significant organizations and programs. Conversations at the Edge (CATE), a series founded by FVNMA in 2001 and held at the Gene Siskel Film Center, is a major meeting place in Chicago for the international media arts community. The Video Data Bank (VDB), one of the leading resources in the United States for videotapes by and about contemporary artists, is located on campus, where it maintains both analog and digital archives, actively engages in the preservation of video art works, commissions critical texts that contextualize artists' work, and oversees the publication of curated programs and artists' monographs. The Gene Siskel Film Center is one of the country's premiere screening venues dedicated to festival series that celebrate diverse voices and international cultures. The Gene Siskel Film Center also premieres trailblazing work by independent filmmakers, restores and revives essential films from cinema history, and hosts insightful, provocative discussions with filmmakers and media artists. In addition, The Art Institute of Chicago's Stone Gallery, housed within the museum's Modern Wing, showcases a world-class collection of film, video, and new media works by an international array of contemporary artists. RESPONSIBILITIES

The Full-Time Faculty in Film, Video, New Media, and Animation will teach and advise undergraduate and graduate students within the interdisciplinary art and design school environment of SAIC. They will teach both studio courses and seminars designed to develop conceptual, critical, and technical knowledge and skills. They will mentor and critique undergraduate and graduate students' independent and collaborative projects.

In addition to teaching, full-time faculty participate in the SAIC community through ongoing curricular development (including designing new courses and reevaluating instructional pathways in the department), departmental administration, and school governance.

QUALIFICATIONS

MFA in filmmaking, animation, or other terminal degree in a relevant field of study is preferred. Exceptional candidates with equivalent experience in the field are also encouraged to apply. Candidates should be practicing media artists who are exhibiting their work nationally and/or internationally, working in innovative and alternative forms of 3D animation. This work may manifest in a variety of ways: single-channel work, installation, immersive environments, virtual reality, and other emergent technologies. The ideal candidate will have advanced proficiency in experimental 3D animation software, such as Maya or Blender. Artists in the early stages of their career with recent, high-profile work are encouraged to apply.

Candidates should have advanced proficiency in experimental 3D animation technologies. Some teaching experience is preferred, particularly within media production pedagogies. Candidates should be committed to a theory-practice model, with an emphasis on experimentation in the production of challenging content in various modes of production, methods of presentation, and forms of dissemination. The ideal candidate will contribute to the diversity of the School by bringing a vision, methodology, and a distinct set of experiences that expand the intellectual conversation and artistic practices within the fields of 3D animation, filmmaking, and media production. We seek candidates with the knowledge and aptitude to teach and mentor students from diverse backgrounds, and who will create a positive, inventive, and productively critical learning environment.
