RE: Drug-Free Schools and Communities Act

It is the policy of the School of the Art Institute of Chicago that SAIC is a designated Drug Free Campus and Workplace. Because the possession, sale, manufacture or distribution of any controlled substance is illegal under both state and federal laws, violators are subject to criminal prosecution and SAIC disciplinary actions.

In accordance with the Drug-Free Schools and Communities Act Amendments of 1989 (PL 101-226), the School of the Art Institute of Chicago (SAIC) distributes a notice by October 1 each year to all students and employees detailing the laws, risks, and treatments associated with drug and alcohol abuse. Because this notice is only one means of communicating this information, we encourage students to contact any member of the Student Affairs staff for further information or counseling. We encourage employees to contact a representative of the Human Resources department for further information or counseling. You may obtain a copy of this notice by contacting the Campus Security office, or by accessing the following link:

http://www.saic.edu/sites/default/files/drug_free_schools_communities_act.pdf

As prescribed by the amendments, the following details the laws, risks, and treatment associated with drug and alcohol abuse.

Illinois Cannabis Control Act 720 ILCS 550/10 (from Ch. 56 1/2, par. 710)

(Text of Section before amendment by P.A. 100-3)

Sec. 10. (a) Whenever any person who has not previously been convicted of any felony offense under this Act or any law of the United States or of any State relating to cannabis, or controlled substances as defined in the Illinois Controlled Substances Act, pleads guilty to or is found guilty of violating Sections 4(a), 4(b), 4(c), 5(a), 5(b), 5(c) or 8 of this Act, the court may, without entering a judgment and with the consent of such person, sentence him to probation.

(b) When a person is placed on probation, the court shall enter an order specifying a period of probation of 24 months, and shall defer further proceedings in the case until the conclusion of the period or until the filing of a petition alleging violation of a term or condition of probation.

(c) The conditions of probation shall be that the person: (1) not violate any criminal statute of any jurisdiction; (2) refrain from possession of a firearm or other dangerous weapon; (3) submit to periodic drug testing at a time and in a manner as ordered by the court, but no less than 3 times during the period of the probation, with the cost of the testing to be paid by the probationer; and (4) perform no less than 30 hours of community service, provided community service is available in the jurisdiction and is funded and approved by the county board. The court may give credit toward the fulfillment of community service hours for participation in activities and treatment as determined by court services.

(d) The court may, in addition to other conditions, require that the person:

(1) make a report to and appear in person before or participate with the court or such courts, person, or social service agency as directed by the court in the order of probation;

(f) Upon fulfillment of the terms and conditions of probation, the court shall discharge such person and dismiss the proceedings against him.

(g) A disposition of probation is considered to be a conviction for the purposes of imposing the conditions of probation and for appeal, however, discharge and dismissal under this Section is not a conviction for purposes of disqualification or disabilities imposed by law upon conviction of a crime (including the additional penalty imposed for subsequent offenses under Section 4(c), 4(d), 5(c) or 5(d) of this Act).

(h) A person may not have more than one discharge and dismissal under this Section within a 4-year period.

(i) If a person is convicted of an offense under this Act, the Illinois Controlled Substances Act, or the Methamphetamine Control and Community Protection Act within 5 years subsequent to a discharge and dismissal under this Section, the discharge and dismissal under this Section shall be admissible in the sentencing proceeding for that conviction as a factor in aggravation.

(j) Notwithstanding subsection (a), before a person is sentenced to probation under this Section, the court may refer the person to the drug court established in that judicial circuit pursuant to Section 15 of the Drug Court Treatment Act. The drug court team shall evaluate the person's likelihood of successfully completing a sentence of probation under this Section and shall report the results of its evaluation to the court. If the drug court team finds that the person suffers from a substance abuse problem that makes him or her substantially unlikely to successfully complete a sentence of probation under this Section, then the drug court shall set forth its findings in the form of a written order, and the person shall not be sentenced to probation under this Section, but shall be considered for the drug court program.

Sec. 10.1. (a) Whenever any person pleads guilty to, is found guilty of or is placed on supervision for an offense under this Act, a fine may be levied in addition to any other penalty imposed by the court.

(b) In determining whether to impose a fine under this Section and the amount, time for payment and method of payment of any fine so imposed, the court shall

(1) consider the defendant's income, regardless of source, the defendant's earning capacity and the defendant's financial resources, as well as the nature of the burden the fine will impose on the defendant and any person legally or financially dependent upon the defendant;

(2) consider the proof received at trial, or as a result of a plea of guilty, concerning the full street value of the cannabis seized and any profits or other proceeds derived by the defendant from the violation of this Act;

(3) take into account any other pertinent equitable considerations; and

(c) As a condition of a fine, the court may require that payment be made in specified installments or within a specified period of time, but such period shall not be greater than the maximum applicable term of probation or imprisonment, whichever is greater. Sec. 10.3. (a) Every person convicted of a violation of this Act, and every person placed on probation, conditional discharge, supervision or probation under Section 10 of this Act, shall be assessed for each offense a sum fixed at:

- (1) \$3,000 for a Class X felony;
- (2) \$2,000 for a Class 1 felony;
- (3) \$1,000 for a Class 2 felony;
- (4) \$500 for a Class 3 or Class 4 felony;
- (5) \$300 for a Class A misdemeanor;
- (6) \$200 for a Class B or Class C misdemeanor.

(b) The assessment under this Section is in addition to and not in lieu of any fines, restitution costs, forfeitures or other assessments authorized or required by law.

(c) As a condition of the assessment, the court may require that payment be made in specified installments or within a specified period of time. If the assessment is not paid within the period of probation, conditional discharge or supervision to which the defendant was originally sentenced, the court may extend the period of probation, conditional discharge or supervision pursuant to Section 5-6-2 or 5-6-3.1 of the Unified Code of Corrections, as applicable, until the assessment is paid or until successful completion of public or community service set forth in subsection (e) or the successful completion of the substance abuse intervention or treatment program set forth in subsection (f). If a term of probation, conditional discharge or supervision is not imposed, the assessment shall be payable upon judgment or as directed by the court.

(f) The court may suspend the collection of the assessment imposed under this Section; provided the defendant agrees to enter a substance abuse intervention or treatment program approved by the court; and further provided that the defendant agrees to pay for all or some portion of the costs associated with the intervention or treatment program. In this case, the collection of the assessment imposed under this Section shall be suspended during the defendant's participation in the approved intervention or treatment program. Upon successful completion of the program, the defendant may apply to the court to reduce the assessment imposed under this Section by any amount actually paid by the defendant for his participation in the program. The court shall not reduce the penalty under this subsection unless the defendant establishes to the satisfaction of the court that he has successfully completed the intervention or treatment program. If the defendant's participation is for any reason terminated before his successful completion of the intervention or treatment program, collection of the entire assessment imposed under this Section shall be enforced. Nothing in this Section shall be deemed to affect or suspend any other fines, restitution costs, forfeitures or assessments imposed under this or any other Act.

(g) The court shall not impose more than one assessment per complaint, indictment or information. If the person is convicted of more than one offense in a complaint, indictment or information, the assessment shall be based on the highest class offense for which the person is convicted.

(h) All moneys collected under this Section shall be forwarded by the clerk of the circuit court to the State Treasurer for deposit in the Drug Treatment Fund and expended as provided in Section 411.2 of the Illinois Controlled Substances Act.

Alcohol's Effects on the Body

Drinking too much – on a single occasion or over time – can take a serious toll on your health. Here's how alcohol can affect your body:

Brain:

Alcohol interferes with the brain's communication pathways, and can affect the way the brain looks and works. These disruptions can change mood and behavior, and make it harder to think clearly and move with coordination.

Heart:

Drinking a lot over a long time or too much on a single occasion can damage the heart, causing problems including:

- Cardiomyopathy – Stretching and drooping of heart muscle
- Arrhythmias – Irregular heart beat
- Stroke
- High blood pressure

Liver:

Heavy drinking takes a toll on the liver, and can lead to a variety of problems and liver inflammations including:

- Steatosis, or fatty liver
- Alcoholic hepatitis
- Fibrosis
- Cirrhosis

Pancreas:

Alcohol causes the pancreas to produce toxic substances that can eventually lead to pancreatitis, a dangerous inflammation and swelling of the blood vessels in the pancreas that prevents proper digestion.

Cancer:

Source: National Cancer Institute -- see <https://www.cancer.gov/about-cancer/causes-prevention/risk/alcohol/alcohol-fact-sheet>:

Based on extensive reviews of research studies, there is a strong scientific consensus of an association between alcohol drinking and several types of cancer. In its Report on Carcinogens, the National Toxicology Program of the US Department of Health and Human Services lists consumption of alcoholic beverages as a known human carcinogen. The research evidence indicates that the more alcohol a person drinks—particularly the more alcohol a person drinks regularly over time—the higher his or her risk of developing an alcohol-associated cancer. Based on data from 2009, an estimated 3.5 percent of all cancer deaths in the United States (about 19,500 deaths) were alcohol related.

Clear patterns have emerged between alcohol consumption and the development of the following types of cancer:

- **Head and neck cancer:** Alcohol consumption is a major risk factor for certain head and neck cancers, particularly cancers of the oral cavity (excluding the lips), pharynx (throat), and larynx (voice box). People who consume 50 or more grams of alcohol per day (approximately 3.5 or more drinks per day) have at least a two to three times greater risk of developing these cancers than nondrinkers. Moreover, the risks of these cancers are substantially higher among persons who consume this amount of alcohol and also use tobacco.

- **Esophageal cancer:** Alcohol consumption is a major risk factor for a particular type of esophageal cancer called esophageal squamous cell carcinoma. In addition, people who inherit a deficiency in an enzyme that metabolizes alcohol have been found to have substantially increased risks of alcohol-related esophageal squamous cell carcinoma.
- **Liver cancer:** Alcohol consumption is an independent risk factor for, and a primary cause of, liver cancer (hepatocellular carcinoma). (Chronic infection with hepatitis B virus and hepatitis C virus are the other major causes of liver cancer.)
- **Breast cancer:** More than 100 epidemiologic studies have looked at the association between alcohol consumption and the risk of breast cancer in women. These studies have consistently found an increased risk of breast cancer associated with increasing alcohol intake. A meta-analysis of 53 of these studies (which included a total of 58,000 women with breast cancer) showed that women who drank more than 45 grams of alcohol per day (approximately three drinks) had 1.5 times the risk of developing breast cancer as nondrinkers (a modestly increased risk). The risk of breast cancer was higher across all levels of alcohol intake: for every 10 grams of alcohol consumed per day (slightly less than one drink), researchers observed a small (7 percent) increase in the risk of breast cancer.

The Million Women Study in the United Kingdom (which included more than 28,000 women with breast cancer) provided a more recent, and slightly higher, estimate of breast cancer risk at low to moderate levels of alcohol consumption: every 10 grams of alcohol consumed per day was associated with a 12 percent increase in the risk of breast cancer.

- **Colorectal cancer:** Alcohol consumption is associated with a modestly increased risk of cancers of the colon and rectum. A meta-analysis of 57 cohort and case-control studies that examined the association between alcohol consumption and colorectal cancer risk showed that people who regularly drank 50 or more grams of alcohol per day (approximately 3.5 drinks) had 1.5 times the risk of developing colorectal cancer as nondrinkers or occasional drinkers. For every 10 grams of alcohol consumed per day, there was a small (7 percent) increase in the risk of colorectal cancer.

Immune System:

Drinking too much can weaken your immune system, making your body a much easier target for disease. Chronic drinkers are more liable to contract diseases like pneumonia and tuberculosis than people who do not drink too much. Drinking a lot on a single occasion slows your body's ability to ward off infections – even up to 24 hours after getting drunk.
